Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/28/2006 has been entered.

Response to Arguments

2. Applicant's arguments filed on 7/28/2006 have been considered and are moot in view of the new ground(s) of rejection under 35 U.S.C. 112, first paragraph.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1, 5, 7, 9-15, 19, 21, 23-26, 29-31, 35, 39, 41, 43, 49, and 51-54 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Each independent claim calls for displaying the information which is unrelated to any controlling computer device in the home in response to representation/information selection. Applicant asserts that the support is found for this limitation in the specification at page 7, lines 1+. Namely, the system displays information associated with "kitchen" such as recipes, shopping lists, etc. However, it is important to note that this portion of the specification does not fully support the claimed limitation. In contrast, figures 5 and 6 show a menu displaying various

features associated with living room and Bobby's room such as Web, **TV**, and Phone. Figures 10, 11 and 13 show a menu displaying various setting features associated with each room, e.g., setting active or inactive state for each service or device associated with each room. From this view, the various features or information presented in the menu(s) associated with living room and Bobby's room must associate with at least a controlling computer device in home such as TV set. Furthermore, the information presented in each menu (as illustrated in figures 5-7, 10, 11, and 13) is directly provided by a set top box 120. It is noted that the set top box is a type of controlling computer device in the home. In other words, the information presented in a menu of a particular room must associates with or relates to at least a controlling computer device, i.e., set top box, in the home. Accordingly, the above limitation is not fully supported by original specification and thus claims 1, 5, 7, 9-15, 19, 21, 23-26, 29-31, 35, 39, 41, 43, 49, and 51-54 introduce new matter.
